

POLYURETHANE FOAM DENSITY 25 KG/³

It's specifically designed for thermal insulation in construction and industry sectors, in applications such as walls, double walls, inferior roofing or cellars, ventilated facades, not passable roof and livestock buildings. NOT contain HFCs, HCFCs, VOCs.

USES

Applied density	25 ~ 35 kg/m³
Thermal conductivity	0,030 ± 0,001 W/m·K (0,031 aged)
Fire reaction	EUROCLASS E
